

Single 30 Amp Relay Module

Introduction

The E-PLEX® 149CT30 Relay Module is an embedded, programmable relay output module that includes logic gates and timers on a two wire multiplexed bus. The 149CT30 includes a re-settable EEPROM memory for programmability, including on-line reconfiguration.

The 149CT30 relay module is well suited for switching heavy loads in automotive, marine and industrial applications.

Key Features

- ◆ 30 Amp AC/DC switch capacity
- ◆ Self Diagnostics
- ◆ 2500 Volt isolation
